

Visual Similarity Duplicate Image Finder Pro Keygen is an app that allows you to find similar images in a snap. Scratch your elbow and you'll search for all the pictures of the scabs, the scraps and other things related to your ailment. It's not just limited to humans and animals though. You can find multiple animal images of crocodiles, ocelots or even camels. You can also find pictures related to other activities such as "sailboat" or "TV". The app includes filters that allow you to browse through similar images according to color, intensity, vibration and overall brightness levels as well as by time intervals such as 1 minute ago or last year. And if that's not enough, there's a free trial available to let you search for similar images just in case. Visual Similarity Duplicate Image Finder Pro Keygen is a free app that generates revenue from advertisements within the app.
